ROQUE JERICO TURINGAN

WEB DEVELOPER

An aspiring software developer/engineer with a solid understanding of MERN Stack. Proficient in HTML, CSS, and JavaScript who create efficient and user-friendly websites. Stays updated with the latest technologies and is dedicated to continuous learning. Enthusiastic about acquiring new skills and expanding expertise in various technologies, programming languages, or frameworks. Currently available for full-time employment.

PERSONAL PROJECTS

NCST E-Grading System (09/2022 - 06/2023)

- Thesis Project: The NCST E-Grading System is a seamless and efficient web-based platform combining PHP and JavaScript. It features automated paper scanning, Latin honors verification, newsfeed, and user-friendly interfaces for teachers to manage grades with ease. The project aims to fully digitalize the grading process of the National College of Science and Technology.

Personal Web-Portfolio

- Developed a dynamic Personal Web-Portfolio using React.js, featuring a diverse range of projects and skills. Hosted on Vercel for easy accessibility and optimal user experience.

Brew Voyage Cafe (06/2023)

- Completed capstone project at Zuitt Coding Bootcamp, showcasing an innovative E-commerce application built using the powerful MERN Stack (MongoDB, Express.js, React.js, Node.js). Demonstrated proficiency in full-stack web development and problem-solving skills.
